Programme of coordinated management of marine litter on the shore of Marseille Provence Metropolis Urban Community (France)

MerTerre, with the help of technicians that clean the beaches of the Marseille Provence Metropolis Urban Community, set up a system of measurement of waste found on three beaches. MerTerre is making measurement on 3 other beaches, using the OSPAR/MerTerre method. This helped understand the state of pollution by marine litter and to carry out a synthesis of actions for its reduction.

In this three year programme, curative and preventive solutions of reduction are proposed for years 2 and 3, while still maintaining the monitoring of waste on the beaches. Within the framework of the programme, various actions aimed at sensitizing the involved actors are also carried out.

Facts

Place / Location	France Marseille Provence Metropolis Urban Community (18 municipalities) in Bouches-du-Rhone, Provence Alpes Côtes d'Azur region.
Commencement Date	September 2011
Duration	3 years
Theme	Prevention, Mitigation, Awareness (Cross-cutting)
Type of Initiative	Policy/Regulation Implementation, Practice/ Activity/ Action, Campaign

MARLISCO is a FP7 project funded by the European Commission.
