Awareness about cigarette butt pollution (France)

Surfrider Foundation Europe La Rochelle local chapter chose to concentrate in 2013 on raising awareness about cigarette butt pollution to the general public and more specifically to students at La Rochelle's University campus as a partnership with a group of students from "IUT La Rochelle" was initiated. The consequences of throwing cigarette butts on the floor were explained and a simple message was delivered: each action made by each person counts! The "Ecobox", a small ashtray that you can put in your pocket, was also distributed, so that a solution was given to smokers to change their behaviour.
