D6.8 MARLISCO Marine Litter Database

The “MARLISCO Marine Litter Database”, is the MARLISCO Project ‘MARine Litter in Europe Seas: Social AwarenesS and CO-Responsibility’ deliverable 6.8, an additional deliverable added at the end of the project as a means of further disseminating project products and activities. It is an interactive database, developed to collate all the litter data that partners have captured during the project as a result of the clean-up activities initiated to raise awareness about the marine litter issue. The database has been developed with an interactive map interface that allows the user to pinpoint the clean-up locations. The database also allows users to interrogate the data to get information on specific types of waste or specific locations.
